Abstract of JP6207014

PURPOSE: To produce a polyimide and its film having high visible light transmittance and excellent toughness and giving good accuracy in registering by transmitted light. CONSTITUTION: A method for producing a polyimide or its film by imidating a polyamic acid) wherein a specified compound having a boiling point higher than that of a tertiary amine used as the imidation catalyst and that of the solvent for the polymerization of the polyamic acid (e.g. anthracene) is incorporated into the polyamic acid.
